| Truck Week protocol to include training. This will come before the board for approval. |
| New deliveries include identification of facilities who administer flu vaccine and updating the PHFp.

| 435 doses |
| The VFC program has provided Dawson County with $24,800 worth of vaccine this past year totaling 435 doses. Policies for inventory management were reviewed and updated: |

- By the time of the site visit all borrowing issues had been resolved. As part of our plan of correction, policies will now address borrower issues.
- Tissue reports now holds both VHC and private vaccine.
- There was an adjustment period for staff getting used to the process of borrowing the new vaccine.
- In the fall of 2019, one of our vaccine providers went to a larger amount of vaccine stock and VFC stock. This happened for a variety of reasons:
  - The site visit was 5/10/16. There was only one finding for borrowing of vaccine between private and VFC.

**New Business:**

- Voting to move forward: Keelin. His made progress in cleaning up the property.
- The city decay ordinance is being enforced. In June there was a city council hearing. The council also received a report.

| Old Business |
| Review and approval of minutes
Jerry made a motion to approve 5/2 meeting minutes, Ross seconded.

| Agenda Item |
| Discussion
None

**Agenda Items:**

- Lauren Murphree, Jan Fedherer
- Timmer Dempswell, Keelin Pena
- Adam Garner, Commissioner
- Ross Farber, Glendive Schools
- Jill Dorn, GWC

**Present:**

7/25/16

**Board of Health**
| Communicable Disease Update | It appears there is a possible E-coli outbreak related to Richey Centennial Activities July 15-17. Jen has just started the investigation today, 7/25/16. It is likely that we will be putting out a press release about prevention of enteric diseases.

Zika:
- Montana has had its third case of Zika reported as of 7/22/16. The cases in Montana are all travel related. Currently the mosquito that carries the disease is not found here. All suspect cases need to be coordinated through the local Health Department and that local jurisdictions, not providers, should be faxing checklists to the state.
- Florida is believed to have the first locally acquired case.

Travel recommendations- Men who have traveled to an area with Zika but don’t have symptoms should use condoms for 8 weeks to protect their sex partners. Men who have Zika symptoms or are diagnosed with Zika should use condoms for 6 months. If the man’s partner is pregnant, the couple should either use condoms or not have sex during the pregnancy. Women who have traveled to an area with Zika but don’t have symptoms should wait 8 weeks after travel before trying to get pregnant. Women who also have Zika symptoms should wait at least 8 weeks after symptoms start before trying to get pregnant.

It is not likely Montana will receive any funding for Zika because we are not a state that will see ongoing transmission.

West Nile: Dawson County hasn’t had a case for 3 years. A mosquito pool in Lake County tested positive. Eight counties to date have been tested, the closest pool of mosquitos tested was in Hill County.

| Tobacco | • Trading Card Kids
  o Interviews on May 11.
  o 22 new TCK were accepted into the program
    • Kenna Begger, Chyna Damm, Cheyenne Damron, Syrell Dufner, Clayton Edwards, Mac Haggerty, Riley Handran, Jayden Holley, Michael Hopfauf, Connor James, Kendra Kaufman, Shelbi Kaul, Robby Keiser, Karsen Kelly, Travis Kinn, Emily Kuehn, Wyniah Mintz, Logan Phipps, Kayla Rod, Tyra Rowsey, Rachel Wolff, Jaley Wyse
  o Tobacco Coalition Meetings
    • Every other month, second Wednesday at noon in the Courthouse Conference Room
    • Next meeting is August 17
    • All are welcome to attend |
The finance committee has approved recommendation to purchase a fourth ambulance.

The city is still looking for a replacement for Wally Broker, the ambulance director. The city is confused because the source of the water is unknown right now. The basement was flooded over the weekend, it will probably require new electrical service for utilities and a sanitary sewer. The basement was also a storage area for water, the sheetrock will have to be replaced. The basement was also a storage area for water.

Jefferson School's basement was flooded over the weekend. It will probably require new electrical service to replace for phone, disaster and emergency services.

Ross, an emergency generator is now in place at DCHS and working. It was funded by a grant from the state.
